

**PLAINFIELD CHARTER TOWNSHIP WATER DEPARTMENT
RELEASE AND AGREEMENT TO HOLD HARMLESS
(ADULT RELEASE)**

Plainfield Charter Township takes pride in its water plant and is pleased to provide tours of the facility. A number of chemicals are used in the plant. Those kept in bulk quantities are listed below. Others, used in smaller quantities, range from ordinary lubricants, paint, and cleaners to vinegar (yes, vinegar is a chemical).

We practice good housekeeping and all chemicals are kept in appropriate containers. Visitors do not handle any of the chemicals or equipment used in the water plant. Although we expect no problems, it is possible that some people may be allergic, or unusually sensitive, to any of these materials. To ensure that the Township will not have to assume liability for a reaction to chemicals it uses, this release has been prepared for each person touring the water plant.

I understand there are many chemicals at the water plant and agree to assume full responsibility for myself in the event of any reaction to any of the chemicals used at the water plant and I agree to hold the Township harmless therefor
